

Pfizer Summer Worker Program

Business Technology Internship Position

Pfizer Business Technology (BT) continuously seeks opportunities to bring fresh and innovative ideas to our business. The Business Technology Summer Worker program is looking for college students who have completed at least two full years of undergraduate study to join our 2016 Summer Student Worker Program. The BT Summer Worker Program gives students the opportunity to spend ~10 weeks at Pfizer and learn about the key role that IT plays in making the world's largest pharmaceutical company successful. Typical responsibilities could include data analysis, business analysis, communications, software engineering, project management, mobility, cyber security, finance and more. This is an internship experience, not a full time role. Internships typically begin late May/early June and run through August.

Requirements:

- Currently enrolled and completed at least two full years of undergraduate study by May 2016 prior to start of assignment.
- Enrolled in undergraduate or graduate studies the semester immediately following the internship.
- At least a 3.0 GPA
- Be legally authorized to work in the US and not require immigration sponsorship

Skills Preferred:

- Computer Science, Information Systems, Engineering, Security, Communications, Business, Life Sciences majors preferred.
- Willingness to contribute fresh and innovative ideas
- Technological aptitude
- Change agile; must take action on projects quickly
- Seizes accountability/self-starter
- Quickly learns new skills and knowledge readily
- Team oriented
